LEARNING GOALS:

This is an inter-disciplinary course whose primary goal is to examine the construction of personal and collective identity through the narrative, whether in the form of personal biography or fiction. We will read and discuss literary texts that encompass a range of experience: from immigration and gendered narratives to explorations of longing and belonging but all of them containing insights into the personal lives and histories of various Asian Americans. In addition we will also read relevant essays and screen selected videos. Above all, we will explore the formation of subjective identities and the roots of memory: how, what, when, and why we remember. The course will require oral presentations and writing of personal essays relevant to the text being investigated.

TEXTS:

America Is in the Heart, by Carlos Bulosan. Seattle & London: University of Washington Press, 2003. ISBN: 0-295-95289-X
