

Building a Mentor Mosaic

Begin building a mentor mosaic. In the first column, list your various support needs. In the second column list the person(s) best suited to fulfill these needs. In the final column, generate a scenario in which you could begin to establish a relationship with each person (e.g. invite them to a talk you are giving, ask them to read a draft of your work, send an e-mail, etc.).

I need support for/ Help with...	Who can fulfill this need?	How can I begin to establish a relationship?
