

Embedding YouTube Videos into PowerPoint Presentations

Many instructors make YouTube videos part of their PowerPoint presentations and play the videos from within a particular slide. This document contains instructions for:

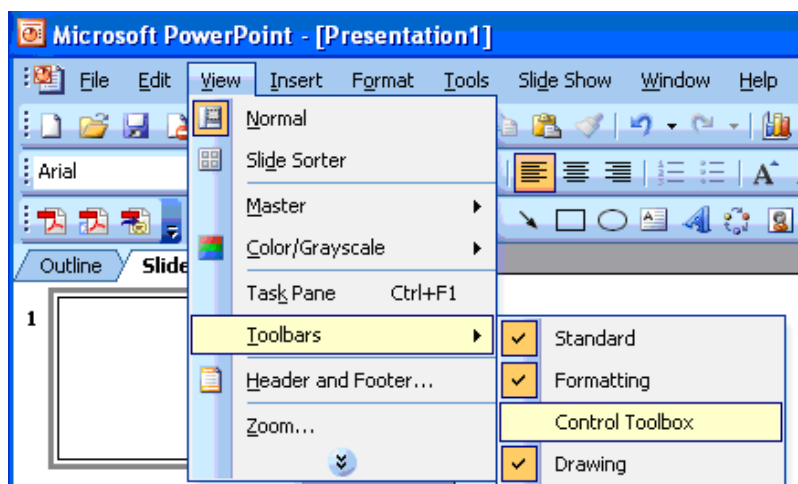

1. embedding YouTube videos using PowerPoint 2003 for Windows for use when presenting with a live Internet connection;
2. embedding YouTube videos using PowerPoint 2003 for Windows for use when presenting without an Internet connection;
3. embedding YouTube videos using PowerPoint 2007 for Windows for use when presenting with a live Internet connection.

Embedding YouTube videos in PowerPoint 2003 for use when presenting with a live Internet connection

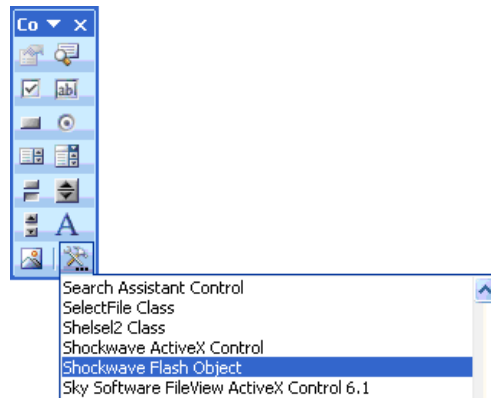

1. Copy the URL of the YouTube video you want to embed from a web browser.

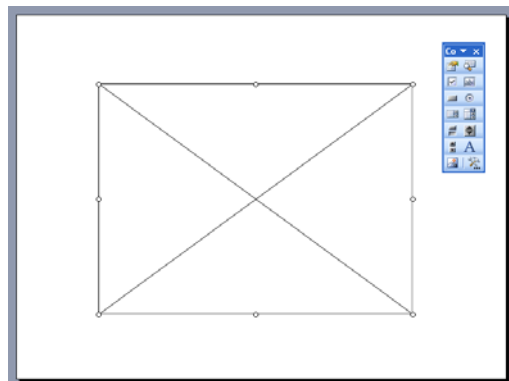

2. Open a PowerPoint presentation and go to a slide where you want to embed the video.
3. From the **View** drop-down menu, select **Toolbars** -> **Control Toolbox**.

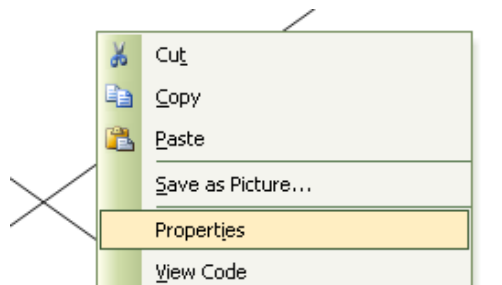

4. Click on the icon for **More Controls** on the lower right hand corner and scroll down to choose **Shockwave Flash Object**.

5. Click on the slide and draw a rectangle the size of the YouTube video you want to embed.
(Drag the cursor from the upper left hand corner to the lower right hand corner.)

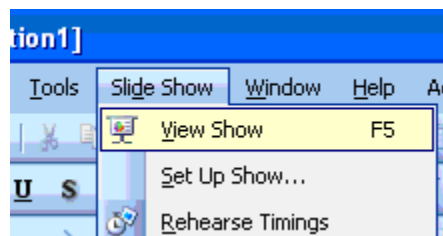

6. Right-click on the rectangle and choose **Properties**.

7. Click on **Movie** and paste the URL of the YouTube movie that you want to embed in the cell next to it.
8. Change the URL pasted by deleting **watch?** and replacing **=** with **/**. (Be careful not to delete **v.**)
9. Set the **EmbedMovie** property to false by clicking on **EmbedMovie** and then choosing **False** from the drop-down menu in the cell next to it.

Movie	http://www.youtube.com/v/4yzUxNb1h4
MovieData	
Playing	False

10. Close the **Properties** window.
11. The YouTube video will now appear when you activate the slide show by choosing **View Show** from the **Slide Show** drop-down menu.

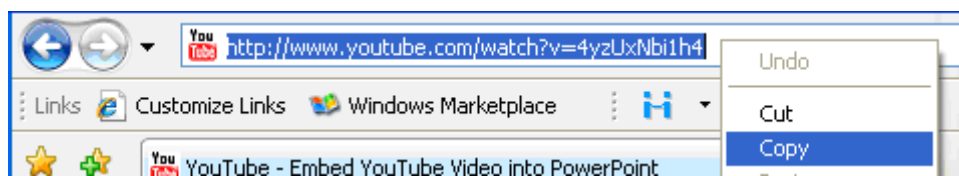

12. Click on the triangular play button to start playing the video.

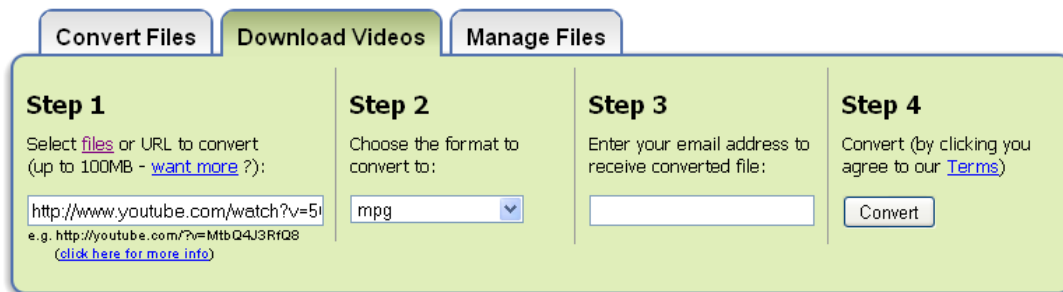

Embedding YouTube videos in PowerPoint 2003 for use when presenting without an Internet connection

Embedding an YouTube video for use when presenting without an Internet connection involves the two steps of downloading the video in a format usable by PowerPoint and inserting it into a slide. Downloaded videos are generally large in size. (A 6-minute video is approximately 60MB.) Video files are linked to PowerPoint presentations and need to be transported with their associated presentations. In other words, if you move or copy a PowerPoint presentation, also move or copy its associated video file/s.

1. Copy the URL of the YouTube video you want to embed from a web browser.

2. Go to the Zamzar website at www.zamzar.com to download the video and convert it in a format usable by PowerPoint.
3. Click on the **Download Videos** tab.
4. Paste the URL of the YouTube video in the text box for **Step 1**. (Take care that **http://** is not repeated.)
5. Choose **mpg** as the format to convert the file to in **Step 2**.

A screenshot of the Zamzar website's 'Download Videos' tab. The interface is divided into four steps:
Step 1: 'Select files or URL to convert (up to 100MB - [want more ?](#)):' with a text box containing 'http://www.youtube.com/watch?v=5i...' and a link 'click here for more info'.
Step 2: 'Choose the format to convert to:' with a dropdown menu set to 'mpg'.
Step 3: 'Enter your email address to receive converted file:' with an empty text box.
Step 4: 'Convert (by clicking you agree to our [Terms](#))' with a 'Convert' button.
At the top, there are three tabs: 'Convert Files', 'Download Videos' (selected), and 'Manage Files'.

6. Type your email address in **Step 3**.
7. Click on **Convert** in **Step 4**. The process of uploading the YouTube video onto a Zamzar server will begin. It should take a few minutes depending on the size of the video. When this process is complete, you will see a message indicating that the process of converting the file

is in process and that you will receive an email message when it is complete. This may take an hour or two.

8. Open the email message from Zamzar and click on the link to download the converted file. (Your file is only stored for one day after receipt of the email.)
9. Click on the green **Download Now** button. (Depending on the size of the file, this may take a few minutes.)

Download your converted file

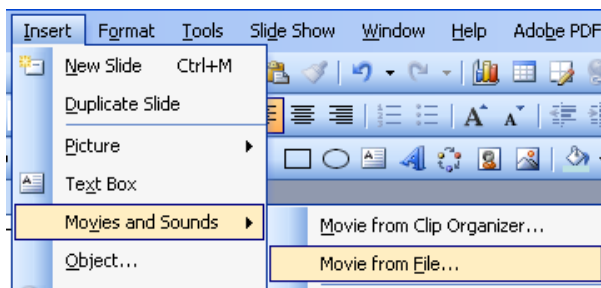

Click below to download your converted file:

[Why not signup for a Zamzar inbox to manage your files ?](#)

5G2pkWK6mEc.mpg (60 MB)

Download Now

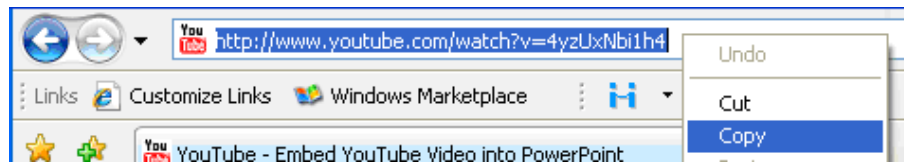

10. Choose **Save File** and click on **OK**.
11. Find the downloaded file on your desktop and move it to the folder where your PowerPoint presentation is located.
12. (Optional) Rename the file from its original name of letters and numbers to a name that is meaningful and descriptive.
13. Open the PowerPoint presentation to the slide where you want to embed the video.
14. From the **Insert** menu, choose **Movies and Sounds** -> **Movie from File...**

15. Navigate to find the video file, select it and click on the **OK** button.
16. Choose to start the movie **automatically** or **when clicked**.
17. Activate the slide show by choosing **View Show** from the **Slide Show** drop-down menu.

Embedding YouTube videos in PowerPoint 2007 for use when presenting with a live Internet connection

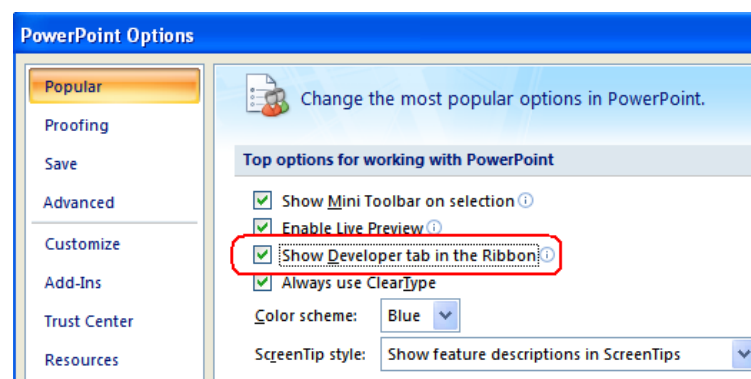

1. Copy the URL of the YouTube video you want to embed from a web browser.

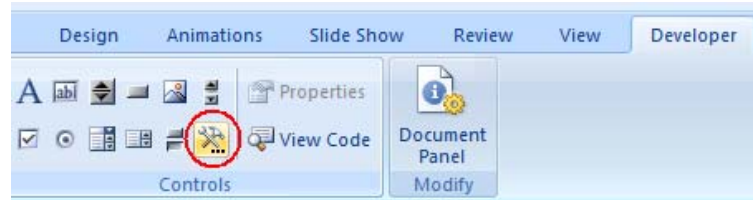

2. Open a PowerPoint presentation and go to a slide where you want to embed the video.
3. Click on the Office icon on the top left hand corner of the screen and choose **PowerPoint Options** at the bottom.

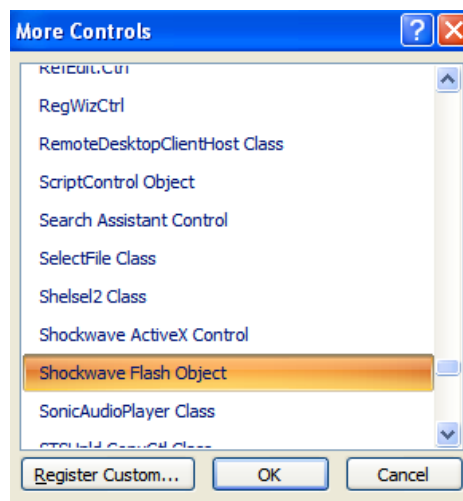

4. Check the **Show Developer tab in the Ribbon** checkbox and click on **OK**.

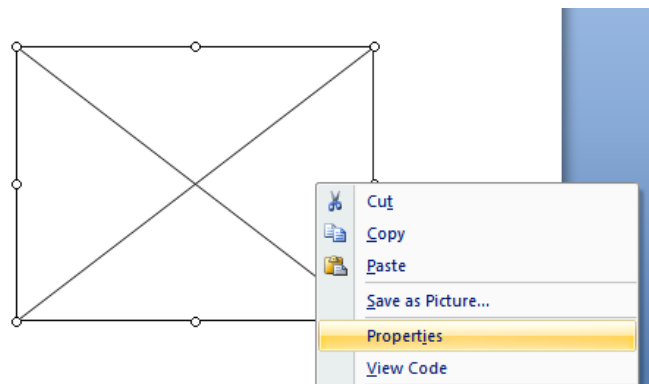

5. Click on the **Developer** tab.
6. Click on the **More Controls** icon.

13. Scroll down to select **Shockwave Flash Object** and click on **OK**.

14. Click on the slide and draw a rectangle the size of the YouTube video you want to embed.
(Drag the cursor from the upper left hand corner to the lower right hand corner.)
15. Right-click on the rectangle and choose **Properties**.

7. Click on **Movie** and paste the URL of the YouTube movie that you want to embed in the cell next to it.
8. Change the URL pasted by deleting **watch?** and replacing **=** with **/**. (Be careful not to delete **v**.)
9. Set the **EmbedMovie** property to false by clicking on **EmbedMovie** and then choosing **False** from the drop-down menu in the cell next to it.
