

GlobalProtect VPN for Windows 32-bit or 64-Bit

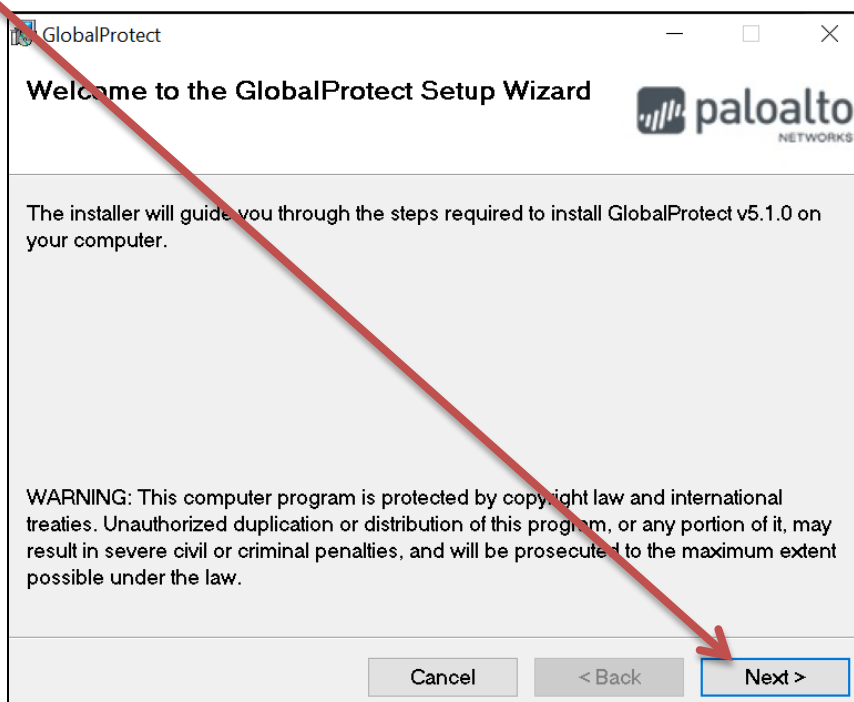

Overview

Follow these instructions to set up your VPN connection on either your Windows 32-bit or 64-bit based computer.

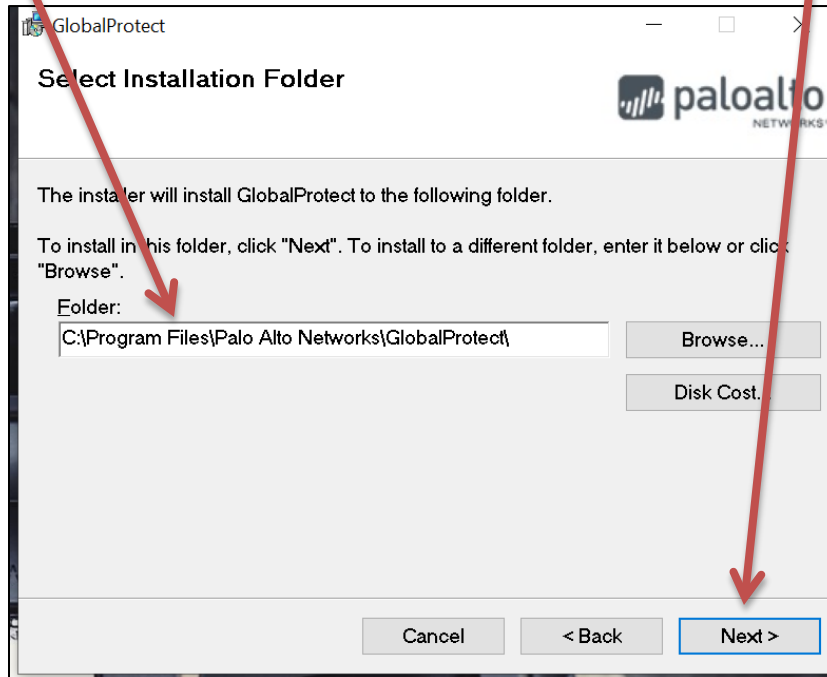

1. Download the GlobalProtect software for the version of Windows you may have from the following website:

<http://www.hunter.cuny.edu/it/it-services/vpn/vpn-software>

2. Once the file has been downloaded, launch the executable.
3. Click "**Next**" when the GlobalProtect Setup Wizard appears:

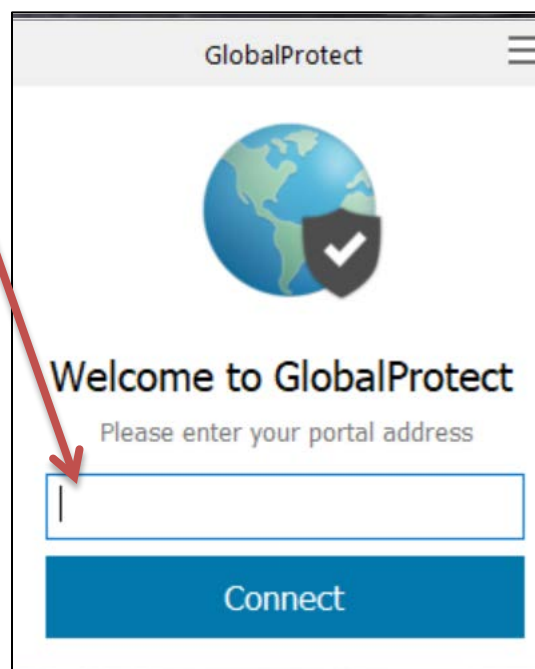

4. Select the **location** you would like to install the software, or simply click "**Next**" to install to the default location.

5. Click "**Next**" to start the installation, and when the installation is complete close the installer.
6. You will then see the following **GlobalProtect** sidebar appear after the installation is complete.
 - a. Enter in the following portal address in the text box:

vp5.hunter.cuny.edu

7. You will then be prompted to sign in with a username and password. Enter your **Hunter NetID** and you **Hunter NetID password** here and hit Sign In.

The screenshot shows a 'GlobalProtect Sign In' dialog box. At the top, it says 'GlobalProtect' and 'Sign In'. Below that, it says 'Enter login credentials'. The portal is identified as 'Portal: vp5.hunter.cuny.edu'. There are two input fields: 'Username' and 'Password'. A blue 'Sign In' button is located below the password field, and a 'Cancel' button is at the bottom. Two red arrows point from the text in step 7 to the 'Username' and 'Password' fields.

8. Once signed in, you will see that you're connected. You should now have access to network drives!
