

GlobalProtect VPN for iOS Devices

Overview

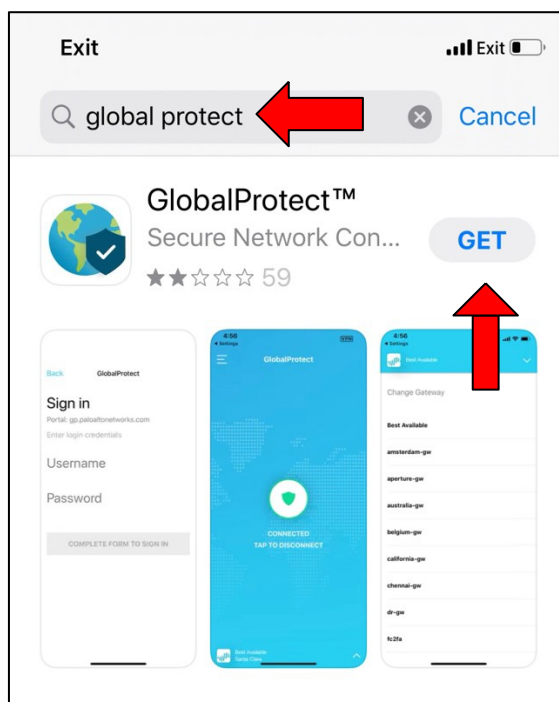

Follow these instructions to set up your VPN connection on an iOS device.

1. Open the App Store by tapping on the icon

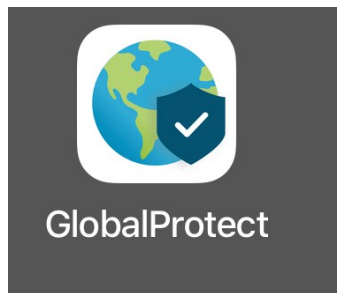

2. Then Search for “**Global Protect**” and tap on “**GET**” to Download the App.

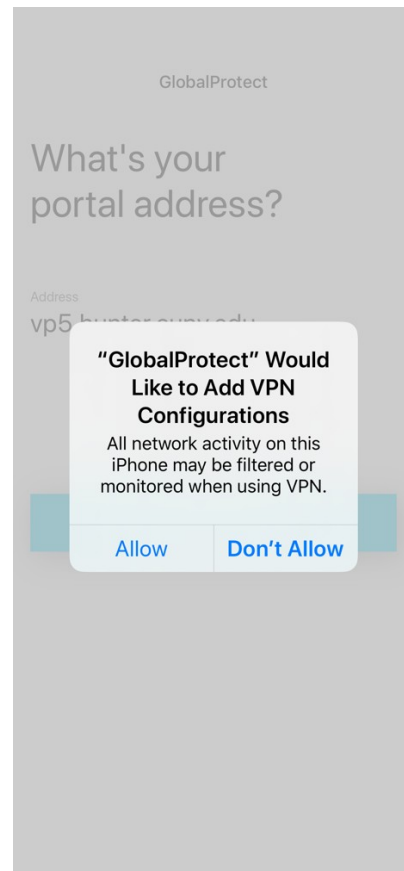

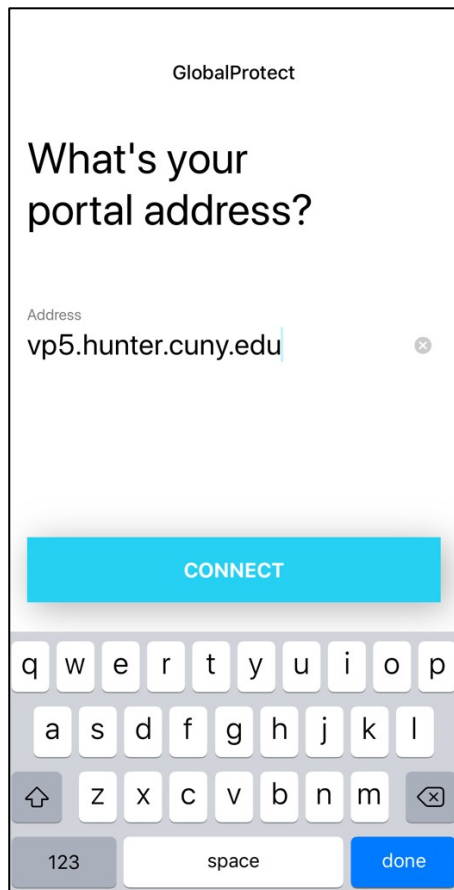

- If it asks for your **Apple ID** password enter it and click Ok.
- If you don't remember your Password visit <https://iforgot.apple.com> and reset your password.

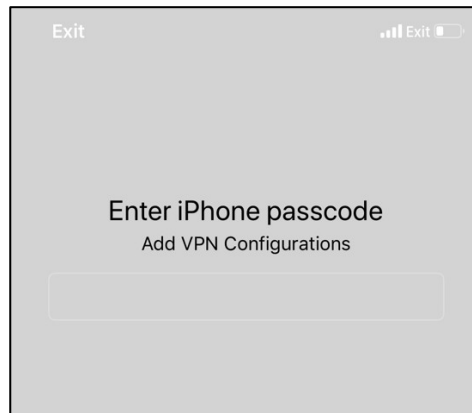

3. Look for the Global Protect app on your Home Screen and launch it.

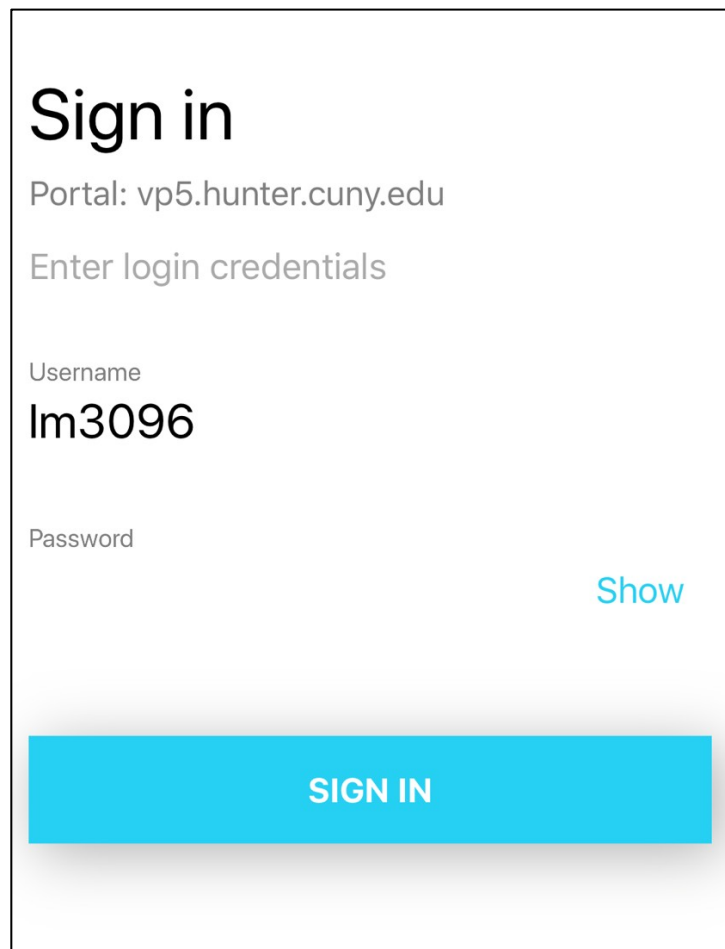

4. Type “vp5.hunter.cuny.edu” as the portal address and then tap on “**Connect**”. Click On “**Allow**” when the prompt appears.

5. Enter your iPhone Passcode or Touch ID/ Face ID on the next screen.

Then the sign in screen will come up. Here you will enter your **NetID** and **Password** as shown in the picture. Tap on Sign in to proceed

Finally, you will see the Welcome to **GlobalProtect** Prompt and you will see your status as connected
