GPA Calculator Tab

There are 3 GPA Calculators that can help students with: (A) Goal-setting, (B) Projecting an end-of-term GPA and (C) Mapping a path for achieving honors, avoiding probation, or satisfying academic aspirations

Graduation Calculator

The purpose of this calculator is to give students a general view of what average GPA they will need to achieve over their final "X" credits in order to reach their desired GPA.

NOTE: The “Current GPA” field will be automatically displayed from the student record; the only fields that need to be completed are “Credits Remaining,” “Credits Required” and “Desired GPA.”

Term Calculator

This calculator is used to see how different grades in currently enrolled (or remaining) courses could impact an overall GPA. Once the list of course(s), number of academic credits (by course), and possible grade(s) for each course are listed (see left), click on “Calculate.” This is the best tool for providing students with an idea of how different grade impact their GPA.

NOTE: A new screen will open with the projected overall GPA. To change the inputted information, simply click “Recalculate.”

Advice Calculator

You need only provide the desired GPA. This calculator is used to figure out how a plan to raise an overall GPA; advice that will display is based on credits and grades needed to achieve the desired GPA.

NOTE: While it is fairly general, it is more specific than the Graduation Calculator. The Advice shown lists the number of credits and specific grades needed to achieve the desired GPA.
