

Office of the President

August 15, 2007

Jennifer J. Raab, President
Hunter College
The City University of New York
695 Park Avenue
New York, NY 10021

Dear Dr. Raab:

Thank you for coming to meet with me to update me on Hunter College's plans to construct a science and health professionals building on the site of the Julia Richmond Education Complex on East 67th Street.

I congratulate you on your plans to improve and expand the science and research facilities available for your students and faculty. As you know, MSKCC is especially supportive of Hunter's initiatives and accomplishments to involve underrepresented minorities in the sciences. We would encourage all your efforts to enhance our interactions with Hunter College faculty and students with regard to research, clinical affiliations, and particularly the training of MSKCC technicians.

I look forward to being kept apprised of the progress of your plans to strengthen your science programs through this new building.

Sincerely,

Harold Varmus, MD
