

HunterUSG

March 30, 2007

Dear President Raab,

In light of your recent meeting with the Undergraduate Student Government on March 28, 2007, we are very confident in the school's proposal to construct a new building. The Undergraduate Student Government, as representatives of the undergraduate students of Hunter College, fully support the plan to construct a new Science-based building on 68th Street as it will provide the school with much needed new space. It will drastically improve Hunter's facilities for all students, regardless of major, and improve the sense of a Hunter community by connecting the Brookdale Campus with the 68th Street campus. We are also grateful that our concerns were actively heard and will be addressed throughout the planning process and, as such, hope to see that the construction of the Hunter Science Building will be successful. Thank you for your time and all of your efforts for Hunter's students.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ahmed Tigani', with a long horizontal flourish extending to the right.

Ahmed Tigani
President

The Undergraduate Student Government of Hunter College
