Presentation Formats

With the foregoing categories in mind, we welcome four types of presentation formats:

1. Oral paper presentations (15 minutes + discussion). The presentations will be organized in thematic sessions.
2. Pre-organized group presentation-(proposal requires a group of 4-5 paper abstracts with moderator, 45 minutes + discussion)
3. Experiential workshops -(conducted by individuals or groups (approximately 90 minutes). The workshops are planned, structured and carried out by the submitters. Interactive workshops usually have an introductory part (presentation) and a participatory part (a theme or question to work on).
4. Poster presentations

While the organizers of this conference come primarily from the discipline of social work, we recognize the value of open and constructive knowledge exchange across professions and would welcome contributions from researchers and practitioners in disciplines other than social work.

All abstract submissions will be anonymously and double-reviewed by an International Abstract Review Committee based on clarity of purpose, excellence and relevance to the conference theme.
