## STATE SHARING PRESENTATION GUIDELINES

An integral feature of the NASFCM Annual Meeting is the sharing of ideas to offer successful solutions to foster care issues. In addition, this is a great opportunity to share information and innovative projects that can be implemented/replicated in other states which provides efficiency and time and financial savings for states. In these challenging financial times sharing innovative ideas and resources is key.

This year we are again asking participants to use the enclosed State Sharing Summary and complete the information requested as well as including a write up of an innovative program in your state you would like to share. The main topic area this year will focus on relative care. Therefore, we are requesting if possible, that you share what your state is doing to support relative care. If you would rather present on a different topic area that is fine. During the state sharing portion of the agenda, presentations are limited to seven minutes.

**Please bring 40 copies of your typed State Sharing Summary to share with your colleagues at the meeting or post it here on the website.** If you have other materials that you want to share, we suggest that you bring a sample to be reviewed with the group and if participants want to get copies of a particular item they can contact the presenter directly to receive it.
