How do sharks look?

Sharks look like a  
torpedo because their skin  
is sleek and they are skiny.  
Sharks are made out  
of cartilage. A typical shark  
has 6 fins.

Name: Brandon Patino

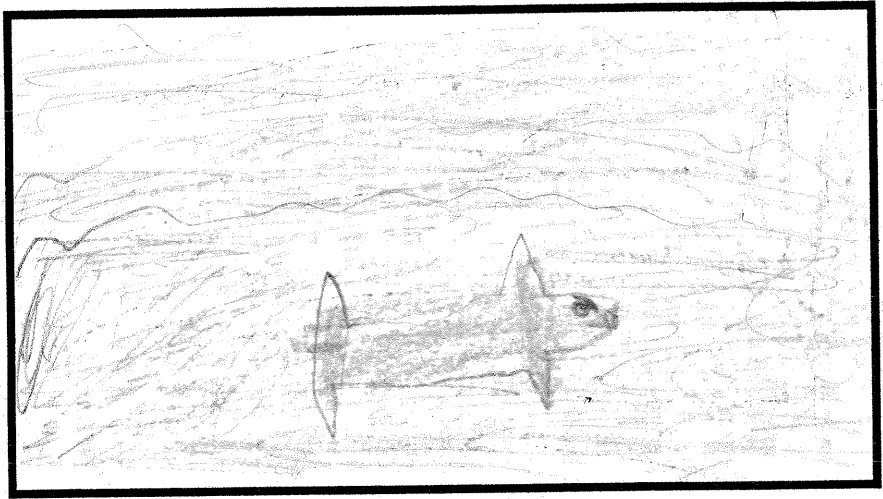

What do sharks eat?

Sharks eat fish or more than  
one fish. They also eat dead whales!  
Sharks also eat turtles too.  
For example the great white shark  
could eat a seal in one bite.  
Some sharks eat garbage that  
is throw into the water. 2

Name: Brandon Patino

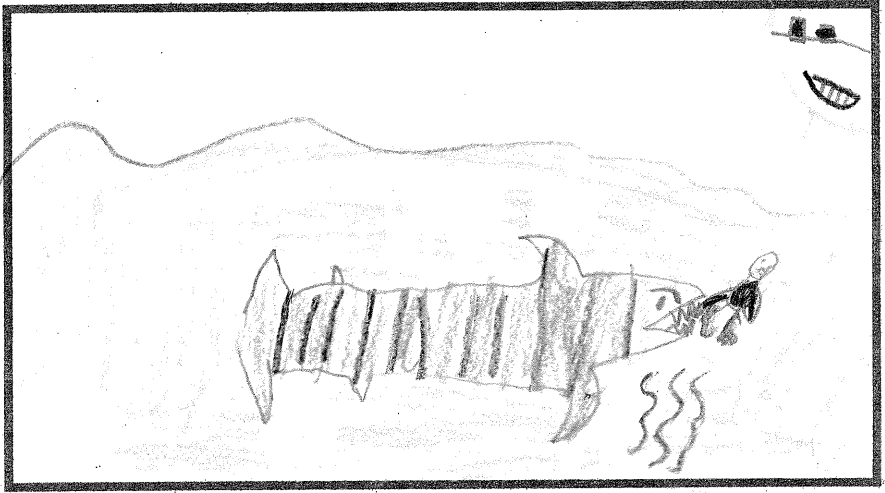

Where do sharks live?

Sharks live in oceans like  
coasts. And others live in  
another part of the the  
ocean like the middle level of  
the ocean. Some live in reefs.  
And some live in the bottom of  
the dark deep sea.

Name: Brandon Paitno

did you now

• That a great white shark  
could grow to 16 feet long?

IF some animals are to

• close to the beach back  
it up. If you spotted a

shark leave it alone or

Maybe it is hunting for  
food or going to kill

Name: Brandon Portino

What I learned

I like learning to discover  
what do sharks do.
