Various Undergraduate Programs leading to an Initial Certificate

Routine Change in Requisites

Rationale:

During the process of re-registering all School of Education degrees that lead to initial certification, several courses were removed from the course of study in multiple programs.

Many of these eliminated courses served as prerequisites and/or corequisites for other courses in the program. For future students who will have never taken these courses, registration will be made impossible.

Given the scope of this system-wide project, this proposal intends to address this problem in one straightforward omnibus proposal. For each course containing an eliminated prerequisite class, the proposed modification updates the course requirements to re-align with the design principles of the re-registered programs.
